EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. This application is in condition for allowance except for the presence of claims 23-29 drawn to an invention non-elected without traverse. Accordingly, claims 23-29 have been cancelled.

3. The following is an examiner's statement of reasons for allowance: it is noted that the prior art teaches similar compositions for use in drilling (e.g. Patel, et al. U.S. Patent number 6,218,342; cited in the international search report). Since these compositions are taught for use in drilling, they are not considered to be a "recovery composition" within the scope of the invention. The prior art fails to disclose or suggest adding a recovery composition including the fatty acid alkyl acid ester, surfactant and/or colloid , and non-amphoteric acid to an oil reservoir as claimed in claim 1. The prior art also fails to teach adding the recovery composition including fatty acid alkyl acid ester, surfactant and/or colloid , and acid to an oil reservoir via the casing after shutting down the well, and adding steam as called for in claim 9. The prior art also fails to teach adding the recovery composition including fatty acid alkyl acid ester, and a colloid to an oil reservoir via the steam line after shutting down the steam line, and adding steam as called for in claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
